THOMAS M. CARR / Some Consequences of <i>The New Rhetoric</i> : A Critical Study	475
Volume Contents	481
Instructions for Authors	485

ARGUMENTATION

Information for Authors

Scope. Argumentation has seen a major revival in the twentieth century, in the United States as well as in Europe, under the influence of the philosophy and linguistic analysis of everyday reasoning. Interest in rhetoric has now extended beyond the traditional boundaries set by the classics.

Argumentation is a new international journal. Its aim is to gather contributions from all schools of thought – ranging from literary rhetoric to linguistics, from history to logic, from theological arguments to legal reasoning, from natural inference to the argumentative structures of science.

This journal is of special concern to specialists in speech and communication, philosophers, literary critics, and linguists, as well as those interested in natural and artificial intelligence.

Manuscripts for publication (the original + two copies) should be sent to Dr Michel Meyer, European Centre for the Study of Argumentation (CEEa), Université Libre de Bruxelles, Institut de Philosophie, 143 avenue A. Buyl, C.P. 188, 1050 Brussels, Belgium. The author should retain an additional copy of the manuscript for reference. Unless a special request is made, copies will not be returned.

All manuscripts should be typed on one side only of A4 paper (or 8.5 × 11 inches), with margins at least 1.25 inches (3.0 cm) on all sides. *All material should be double-spaced*, including quotations, notes, bibliographies, and figure captions. Quoted passages of more than 40 words should be set off from the text by indenting the left-hand margin five spaces. Pages should be numbered consecutively throughout the manuscript.

The principal language of the journal is English, but papers in French are also accepted.

Footnotes should be typed double-spaced and collected together at the end of the manuscript. They should be numbered consecutively, and indicated in the text by superior numbers. Please keep notes to a minimum, and avoid long or discursive notes. Citations should be incorporated into the text – Kemeny (1953); Harrah (1971, 1984).

References should be listed at the end of the article, after the Notes, in alphabetical and chronological order.

(a) References to books should include the author's name; year of publication; title in full, underlined to indicate italics; publisher's name; place of publication; volume (if appropriate); and page number cited. The following format should be used:

Hamblin, C.L.: 1970, *Fallacies*, Methuen, London.

(b) References to articles in periodicals should include the author's name; year of publication; title of article, in single quotation marks; full title of periodical, underlined; volume number; and first and last page numbers. The following format should be used:

Woods, J. and D. Walton: 1982, 'Question-Begging and Cumulateness in Dialectical Games', *Noûs* 16, 585-605.

(c) References to essays in edited collections should include the author's name; year of publication; title of essay, in single quotation marks; editor's name; title of volume, underlined; publisher; place of publication; and first and last page numbers. The following format should be used:

Abelson, R.P.: 1973, 'The Structure of Belief Systems', in R.C. Schank and K.M. Colby (eds.), *Computer Models of Thought and Language*, Freeman, San Francisco, pp. 287-339.

Camera copy for illustrations and figures should be submitted with the manuscript. Each illustration should bear the author's name and the figure number, written on the back of the figure. Line drawings should be directly reproducible, with the lettering of a size that will be legible after reduction; halftones should be submitted as glossy photographs. Figure captions should be typed double-spaced on a separate page of the manuscript. Figures should be referred to as 'Fig.' in the captions, but spelled out in the text.

Abstract. Papers in French should be provided with an extended Abstract in English. Papers in English should have a short abstract, of not more than 200 words, which clearly summarizes the paper.

Key Words. Please provide a list of five to ten key words.

Number tables and illustrations in the order in which you want them to appear in your article: one consecutive series for tables (Table I, Table II, Table III), and another for figures (Fig. 1, Fig. 2, Fig. 3). Cite each table and figure at least once in the text.

Unusual symbols should be identified at their first occurrence, and an alternative or equivalent symbol or sign should be provided if the one required is rare. Special care should be taken to distinguish between the letter *O* and zero, the letter *l* and the number one, kappa and *K*, mu and *u*, nu and *v*, eta and *n*. Subscripts and superscripts should be marked if not clear. The use of *italics* is to be indicated by single underlining; **bold-face** by wavy underlining. *Note that letters used as symbols will be set in italics unless otherwise indicated.*

Permissions. It is the responsibility of the author to obtain written permission for quotation from unpublished material, or for all quotations in excess of 250 words in one extract or 500 words in total from any work still in copyright, and for the reprinting of illustrations or tables from unpublished or copyrighted material.

Copyright will be established in the name of Kluwer Academic Publishers. Authors will be asked, upon acceptance of an article, to transfer copyright of the articles to the publishers. This will ensure the widest possible dissemination of information under copyright laws.

Proofs. The author will receive two sets of page proofs of the article from the printer (with an annotated copy of the MS), and is requested to return one, corrected (with the MS), to the publisher without delay. In the case of proofs not being returned in time, they may be read by the editor against a second copy of the MS and passed for publication without the author's comments.

Offprints. Twenty-five offprints of each article will be provided free of charge. Additional offprints can be ordered when proofs are returned to the publisher.

No page charges are levied on authors or their institutions.

MANUSCRIPTS ON DISKETTE

Format

1. We strongly prefer manuscripts typed on IBM-compatible computers, with operating system MS DOS (versions 3.2 or higher), and wordprocessing package WordPerfect (4.2 or higher).
2. We also accept files in most other wordprocessing packages, that run under MS DOS, and Apple Macintosh diskettes.
3. If this combination is not available to you, please contact us as soon as possible.
4. If you work with the Graphical User Interface *Windows* or on a Macintosh computer, use only regular fonts like Courier, Times, Helvetica or standard Symbol.

DO's

1. *File.* Identify your file clearly with a sensible name. Make absolutely sure that you send us your final version, and that the printout is identical to what you have saved on the diskette.
2. *Consistency.* Be absolutely consistent and check the use of punctuation, abbreviations, capitals and lower case in headings, spelling, etc. If possible, use the spelling checker on your computer.

3. *Special characters.* If the ASCII character set or the character set(s) of your wordprocessing package does not contain the special characters you need, key in a code between angle brackets, < >, and use this each and every time you want the character to appear. You could, for example, use <gamma> for a lower case Greek gamma (γ) and <Gamma> for an upper case Greek gamma (Γ). Make the code self-explanatory. *Note:* Always supply us with a list of the codes that you have used!
4. *Headings.* Start headings etc. flush left, with two space lines above (i.e. three Hard Returns) and one space line below (two Hard Returns). Distinguish different levels of headings and be consistent.
5. *Paragraphs.* Indent all paragraphs with a [TAB] code, and separate them from one another with one Hard Return.
6. *Block quotations* should be indented with an [Indent] code and should have one space line (i.e. two Hard Returns) above and below.
7. *Figures* should be submitted in camera-ready form. The position of the figure in the text should be indicated in the margins of the hard copy. Figure legends should be placed at the end of your file.
8. *Tables.* We prefer tables to be submitted in camera-ready form. If you also put your tables on diskette, please separate columns with [TAB] codes (not with spaces) and, consequently, adjust the tabular stops to position the columns.
9. *Equations.* One-line equations without fractions can be typeset from the diskette when they are keyed in as plain text. Other equations can not be used from the diskette: they will be typeset manually from the hard copy.
10. *References and Notes.* Strictly follow the Instructions for Authors of the journal in which the article will be published for the style of referencing and the use of notes.

DON'Ts

1. *Hyphenation.* Do not hyphenate words at the end of a line. Use only one hyphen for words such as "well-being", and "re-do" and use two hyphens for sequences of dates and years such as "conference dates are 12--15 September, 1992", "age groups between 20--30 years are welcome", and page number indications in References, e.g. "pp. 240--243".
2. *Hard Returns.* Do not use Hard Returns except when absolutely necessary, such as at the end of paragraphs, headings, etc. Otherwise, let the word wrap feature of your wordprocessor do this work for you.
3. *TAB feature and Spacebar.* If you need more than one space between two items, e.g. when you write in columns, always use the [TAB] feature of your wordprocessing package. Use the spacebar only for separating words from one another. Do not use the spacebar to format tables, for centering or laying out texts, or for any other form of line or page formatting.

Delivering your article

1. Always supply us with both the hard-copy (printout) version of your final

text and the diskette.

2. Label your diskette properly, giving exact details on operating system and software used.
3. Always retain a backup copy of your diskette.

Further information is available from Kluwer Academic Publishers, P.O. Box 17, 3300 AA Dordrecht, The Netherlands. (Telephone: 78-334263. Telex: 29245 kapg nl or Fax: 334254).
